

MIVANOR

WASTEWATER TREATMENT

MivaMag™ Modular

PRODUCT DATA SHEET

MivaMag Modular system

The barrack modules are designed and constructed in accordance with SINTEF Certification TG 2557 and corresponding standards.

The MivaMag Modular solution has 2 barracks placed next to each other, joined at the middle. They house the complete MivaMag system and treatment chemicals. An air-conditioning unit and heating fans provide heating in the barracks.

A single personnel door provides easy access into the barrack modules. There is also a personnel door between the two barrack modules.

The layout of the modules provides ease of access for loading and unloading of the sludge container and the treatment chemicals, and only requires access from 2 sides.

OPTIONS

- Remote control operation of folding doors
- Windows in folding doors

TECHNICAL SPECIFICATION

Construction Certification		SINTEF TG 2557
Construction – Barrack module A		Wooden construction
Construction – Barrack module B		Wooden construction + wet room standard
Internal height	[m]	2,7
Footprint MivaMag Modular system	[m ²]	41
